Greetings from Kenya!!

How are you? Here, the dry season is starting. The sun light is so hot and strong, but it is cool under the shades. This dry season will continue till the end of March without rain. Due to the Presidential re-election, a few big cities have demonstrations and violations and crimes. However, our village is still peaceful. We would like to inform you our special activities over usual schedules for last 3 months.

We have a wonderful news. We have established 2 new churches in places where there were no churches. And two churches joint our mission society Global Outreach Alliance (GOA). Therefore, in our GOA, now we have 23 churches. We also installed 8 new evangelists. Especially, the new pastor was installed in our Mission base church where Joshua was the supplies the pastorship for last two years since the previous pastor left.

We purchased 350 bags of corns to feed children in Kalemyang, West Pokot, Kenya, where the school we built. Still, we'll purchase about 150 bags of beans in December for them. This will feed about 700 children next year around.

On October 7, we held Sunday School Training in our Mission Base. We focused on delivering Bible messages at age appropriate level. We also shared the problems we face in each church. After training, the teachers had Kenyan lunch together provided by the Mission and had a good fellowship. It encouraged teachers a lot.

Also in October, we visited a place called, "Matumbei" as the people were starting a new church. Matumabei was the place where 24 houses were lost with fire last spring. So Joshua visited with the living supplies for 166 family members. When Kenyans start a new church, they start their worship under the tree until they find a building or build a church. It was raining all day and we worship under the big tree in rain. About 50 people welcomed us. Joshua shared the message. Judy passed a

lollypop to everyone after the worship. They wanted to have their own church building. We encourage them to equip the land first. We also encouraged them to pray hard for the church building. It was the first experience for me to worship the Lord under the tree in Kenya.

From November 10 to 18, Joshua instructed an intensive course in African Theological Seminary. The course is called "The Ministry of the Pastor" - the introduction course for the seminarians. He also shared his pastoral experiences with students who are Pastors and ministers. He enjoyed teaching this class very much even though driving on rocky and dusty roads 2 hours everyday tired him.

In November, as now, we start construction of "Nabeki" church on top of Mt. Elgon by Uganda. The road condition is so bad. The tractors have hard time going up. Therefore, it is difficult to deliver the supplies to the church site. The most unexpected cost is transportation of bringing the materials to the site. They charge enormously. However, the construction is progressing slowly. We plan to complete the building by the end of December.

From December 7 to 9, we are planning and preparing our Youth Retreat. We provide Youth Retreat 3 times a year, 2 nights and 3 days. Usually, we have 150 students attending each retreat. We train students with morning devotion, worship, seminar, group activities, games, competitions, revivals, and prayer time, just like Youth Retreats in the United States. Please pray for the students and leaders, and all the staffs who will involve in this retreat.

In October and November, new baby goats were born. Each month, it is our blessing from God that our family members increase. Their names are "Rambo" and "Snowie." Now we have 10 healthy goats.

We thank you again for your support and prayer. We do not have Thanksgiving here, but, you have a wonderful family time during Thanksgiving. God bless you!

November 21, 2017.
